CIVIL ENGINEERING

The Department of Civil Engineering (https://www.uakron.edu/engineering/CE/) offers an undergraduate program leading to the Bachelor of Science in Civil Engineering. The department also offers programs leading to the Associate of Applied Science and the Bachelor of Science in Construction Engineering Technology, the Associate of Applied Science in Construction Field Operations, the Associate of Applied Science in Land Surveying, and the Bachelor of Science in Surveying and Mapping, as well as a number of certificates. The department offers graduate programs leading to a Master of Science in Civil Engineering, and an interdisciplinary Doctor of Philosophy in Engineering, along with graduate-level certificate programs for practicing professionals.

Information specific to the available program options in civil engineering is available:

- Civil Engineering, BS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/civil-engineering-bs/)
- Civil Engineering, Co-op Option, BS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/civil-engineering-co-op-bs/)
- Construction Engineering Technology, AAS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/construction-engineering-technology-aas/)
- Construction Engineering Technology, BS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/construction-engineering-technology-bs/)
- Construction Estimation, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/construction-estimation-certificate/)
- Construction Field Operations, AAS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/construction-field-operations-aas/)
- Construction Management, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/construction-management-certificate/)
- Geographic and Land Information Systems, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/geographic-land-information-certificate/)
- Heavy Construction, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/heavy-construction-certificate/)
- Land Surveying, AAS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/land-surveying-aas/)
- Residential Inspection, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/residential-inspection-certificate/)
- Surveying and Mapping, BS (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/surveying-mapping-bs/)
- Surveying for Civil Engineers, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/surveying-civil-engineers-certificate/)
- Surveying, Certificate (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering-polymer-science/civil-engineering/surveying-certificate/)

Surveying and Mapping (SURV)

SURV:100 Introduction to Geomatics (2 Credits)
An introductory course into the field of surveying and mapping technology. Integrated topics include: types of surveys, cartography, and geographic information systems. (Formerly 2980:100)

SURV:101 Basic Surveying (3 Credits)
Corequisite: MATH 153 or MATH 154 or MATH 255 or MATH 356 or MATH 145 or MATH 149 or MATH 221 or MATH 222 or MATH 335. Care and use of basic surveying field instruments and the basic computations and adjustments necessary to post process the field survey measurements. Field Practice. (Formerly 2980:101)

SURV:102 Topographic Surveying (2 Credits)
Prerequisites: SURV 101 and MATH 153. Computations and adjustments of field survey measurements using both conventional and computer methods. Development of maps and plans stressed. Field Practice. (Formerly 2980:102)

SURV:105 Introduction to Geographic & Land Information Systems (3 Credits)
Introduction to the principles and concepts of Geographic and Land Information Systems used in surveying and mapping applications. Laboratory. (Formerly 2985:101)

SURV:123 Surveying Field Practice (2 Credits)
Prerequisite: SURV 102 or equivalent. Practical experience in use of surveying equipment and methods of surveying. Provides students with responsibility for making decisions and planning and directing complete project. (Formerly 2980:123)

SURV:155 Computer Applications in Surveying (3 Credits)
Use of current surveying software to solve typical problems/projects in surveying technology. (Formerly 2980:155)

SURV:170 Surveying Drafting (3 Credits)
Corequisite: MATH 152 or permission. Drafting procedures, techniques, and tools required for the various phases of survey office work. Projects include topographic maps, plan and profile drawings, and cross-section drawings. Laboratory. (Formerly 2980:170)

SURV:201 Intermediate Geographic and Land Information Systems (3 Credits)
Prerequisite: SURV 105. Continued instruction in the hands-on technical applications of Geographic and Land Information Systems. Laboratory. (Formerly 2985:201)

SURV:205 Building Geodatabases (3 Credits)
Prerequisite: SURV 105. Introduction and application of spatial geodatabases. The student will create, use, and manage geodatabases. Geodatabases are used for storing spatial and attribute data. Laboratory. (Formerly 2985:205)
SURV:222 Construction Surveying (3 Credits)
Prerequisite: SURV 101. Methods and procedures for establishing line and grade for construction. Circular and parabolic curves. Cross-sectioning methods and earthwork. Communication and plan reading. (Formerly 2980:222)

SURV:223 Geospatial Technologies (3 Credits)
Introduction to current and emerging geospatial technologies, such as Geographic Information Systems, remote sensing and global positioning systems, and exploring mapping data sources. Laboratory required. (Formerly 2980:223)

SURV:225 Advanced Surveying (3 Credits)
Prerequisite: SURV 101. Introduction to flood maps, ALTA surveys, and geodesy. Advanced topics in control surveys, state plane coordinates, and bearings from celestial observation. (Formerly 2980:225)

SURV:228 Boundary Surveying (3 Credits)
Prerequisite: SURV 101 or equivalent. Analysis of evidence and procedures for boundary location; establishing and/or locating points for boundary and mortgage location surveys; plat preparation. Ohio survey minimum standards. (Formerly 2980:228)

SURV:251 CST Seminar (1 Credit)
Prerequisite: SURV 222. Prepares students for the National Society of Professional Surveyors Certified Surveying Technician (CST) Level I Examination. Examination is given at the end of the review sessions. (Formerly 2980:251)

SURV:310 Survey Computations & Adjustments (2 Credits)
Prerequisite: SURV 225. Concepts relating to measurement error, probability, and reliability. Computation and adjustment of horizontal and vertical networks. (Formerly 2980:310)

SURV:315 Boundary Control & Legal Principles (3 Credits)
Prerequisite: SURV 228. Historical development of boundaries, rectangular system of public land surveys, systems to describe property, surveyor’s responsibility to understand and properly apply legal principles to boundary. (Formerly 2980:315)

SURV:325 Safety for Surveyors (1 Credit)
To provide safety and first aid training required for surveying. (Formerly 2980:325)

SURV:330 Applied Photogrammetry (3 Credits)
An introduction to metrical and quantitative photogrammetry using both hard- and soft-copy systems. Laboratory. (Formerly 2980:330)

SURV:335 The Business of Surveying (2 Credits)
A course focused on the business aspects of surveying, including development of business plan components for a company offering professional surveying and mapping services. (Formerly 2980:335)

SURV:340 Cadastral Surveying (2 Credits)
Prerequisites: SURV 101. A study of the official surveys of the United States. Cadastral surveys establish or recreate boundaries and /or tracts of land. (Formerly 2980:340)

SURV:350 Mapping with Drones (3 Credits)
An introduction to Unmanned Aircraft Systems (UAS) and its associated applications as it relates to land surveying and mapping. (Formerly 2980:350)

SURV:410 LiDAR and Laser Scanning (2 Credits)
Prerequisite: SURV 105. Introduction to LiDAR (aerial and terrestrial) scanning as it applies to surveying and mapping. The course will discuss the collection and dissemination methods of the data. (Formerly 2980:410)

SURV:415 Legal Aspects of Surveying (3 Credits)
Prerequisite: SURV 315. A study of statute and common law related to land surveying. Evidence and the surveyor’s role in the judicial process. Interpreting and writing land descriptions. (Formerly 2980:415)

SURV:420 Route Surveying (3 Credits)
Prerequisite: SURV 225. Surveying for long but narrow strips of land such as highways, railroads, and pipe lines. Course includes all requisite calculations and drawings. (Formerly 2980:420)

SURV:421 Subdivision Design (3 Credits)
Prerequisites: SURV 155, SURV 222, and SURV 315. Site analysis, land use controls, and plotting procedures. Laboratory includes preparation of various types of projects leading to a complete subdivision. (Formerly 2980:421)

SURV:422 Global Positioning System Surveying (3 Credits)
Prerequisites: SURV 225 and SURV 105 or permission. Introduction to the Global Positioning System (GPS). Course includes the planning, data collection, and processing of GPS data. (Formerly 2980:422)

SURV:425 Land Navigation (3 Credits)
Interpretation and use of topographic maps. Study of basic map elements with emphasis on identification of features and coordinate systems. Map use for land navigation. (Formerly 2980:425)

SURV:426 History of Surveying To 1785 (2 Credits)
A history of land surveying. Emphasis on the development of survey procedures through history. Part I (to 1785) covers the ancient world to the colonial period. (Formerly 2980:426)

SURV:427 Ohio Lands (2 Credits)
Study of the history of the original Ohio Land Subdivisions (Formerly 2980:427)

SURV:428 History of Surveying Since 1785 (2 Credits)
A history of land surveying. Emphasis on the development of survey procedures through history. Part II (Since 1785) covers the history of the United States to date. (Formerly 2980:428)

SURV:430 Surveying Project (3 Credits)
Prerequisite: Senior standing and placement of advisor. Provides opportunity to research and develop a specific surveying project within chosen area of surveying. Oral, written and graphical presentation of completed project(s). (Formerly 2980:430)

Gen Ed: Capstone

SURV:431 Senior Seminar (2 Credits)
Prerequisite: Senior or greater standing. Students demonstrate knowledge and skills acquired as surveying majors through assessment testing and review of professional licensure laws. Preparation for national exams. (Formerly 2980:431)

SURV:445 Applications in GIS using GPS (3 Credits)
Prerequisite: SURV 105. Advanced instruction in GIS applications using GPS as well as other surveying and mapping methods. Laboratory. (Formerly 2980:445)

SURV:450 Topics in Professional Practice (2 Credits)
Prerequisite: Junior or greater standing. Topics in applicational areas of surveying from the point of view of the practitioner and the consumer of land-related data. (Formerly 2980:450)

SURV:489 Special Topics in Surveying (1-3 Credits)
Prerequisite: Permission. Special lecture/laboratory courses offered once or only occasionally in areas where no formal course exists. (May be repeated for a maximum of six credits.) (Formerly 2980:489)
CONSTRUCTION INSPECTION (3 Credits)
Prerequisite: COET 131. Fundamentals of total quality management and concrete. (Formerly 2990:234)

STRUCTURAL ANALYSIS (3 Credits)
Prerequisites: COET 125 and COET 225. Principles of stress and computing skills for construction managers including software for estimating, scheduling, presentations, general business administration and graphics. (Formerly 2990:125)

CONSTRUCTION Formwork (3 Credits)
Prerequisite: Permission or instructor. Introduction to design and construction of formwork and temporary wood structures. (Formerly 2990:361)

ADVANCED ESTIMATING (3 Credits)
Prerequisite: COET 245. This course focuses on estimating and bidding for public and private construction. Includes heavy/highway, residential and building construction with use of computer software to facilitate bid price. (Formerly 2990:358)

CHECKED: 2980:490 Workshop in Surveying (1-3 Credits)
Prerequisite: Permission. Group study of special topics in surveying. May not be used to meet undergraduate major requirements in surveying. May be used for elective credit only. (May be repeated for a maximum of six credits.) (Formerly 2980:490)

SURV:495 Internship: Surveying and Mapping (3 Credits)
Prerequisites: 64 hours in program and permission. Supervised work experience in surveying and mapping to increase student understanding of surveying and mapping technology. (Formerly 2980:495)

SURV:497 Surveying Honors Project (3 Credits)
Prerequisite: Senior standing in the honors program. Provides opportunities to research and develop a specific surveying project within chosen area of surveying. Oral, written, and geographical presentation of completed projects. (Formerly 2980:497)

SURV:498 Independent Study (1-3 Credits)
Prerequisite: Permission or instructor. Directed study in a special field of interest chosen by student in consultation with instructor. (May be repeated for a total of six credits.) (Formerly 2980:498)

Civil Engineering Technology (COET)

COET:125 Statics (3 Credits)
Prerequisites: MATH 154 and PHYS 160. This course covers forces, resultants, and couples. Equilibrium of force systems. Trusses, frames, centroid, moment of inertia, and friction. (Formerly 2990:125)

COET:129 Professional Topics in Construction (3 Credits)
This course introduces students to important professional topics and computing skills for construction managers including software for estimating, scheduling, presentations, general business administration and graphics. (Formerly 2990:129)

COET:131 Building Construction (2 Credits)
Materials and methods used in construction. Encompasses buildings constructed with wood, steel, concrete or a combination of these materials. (Formerly 2990:131)

COET:150 Plan Reading (2 Credits)
Prerequisite: COET 131. The language of construction. Symbols, scales, plan views, elevation views, sections and details. Quantity take-off estimation. (Formerly 2990:150)

COET:225 Strength of Materials (3 Credits)
Prerequisite: COET 125. Stress, strain and stress-strain relationships. Tension, compression, torsion, beams. Shear and moment diagrams. Combines stresses. (Formerly 2990:225)

COET:226 Construction Supervision (3 Credits)
Introduction to topics on construction supervision including planning, directing and coordinating onsite activities to build quality defined by drawings and specifications. (Formerly 2990:226)

COET:234 Elements of Structures (3 Credits)
Prerequisites: COET 125 and COET 225. Principles of stress and structural analysis, concepts of steel, timber design, and reinforced concrete. (Formerly 2990:234)

COET:235 Construction Inspection (3 Credits)
Prerequisite: COET 131. Fundamentals of total quality management and construction inspection. (Formerly 2990:235)

COET:237 Materials Testing I (2 Credits)
Prerequisite: COET 154. Laboratory testing of soils with emphasis on physical properties of soil. Laboratory and field procedures used for quality control. (Formerly 2990:237)

COET:238 Materials Testing II (2 Credits)
Prerequisite: MATH 154. Mix design of concrete. Laboratory testing of concrete containing ordinary Portland cement and pozzolanic admixtures. Experiments demonstrate physical properties as related to design and quality control. (Formerly 2990:238)

COET:239 Construction Geomechanics (3 Credits)
This course provides an understanding of the impact of the mechanical behavior and engineering properties of soils and rock related to construction processes and methods. Topics include erosion control, laboratory test methods for engineering design, flood and mass wasting behavior, soil subsidence, and sustainability of engineered coastal structures. (Formerly 2990:239)

COET:245 Construction Estimating (3 Credits)
Prerequisites: MATH 154 and COET 150. Quantity takeoffs in construction to include mass excavations, foundation systems, structural steel, residential construction, and various commercial construction methods. (Formerly 2990:245)

COET:246 Site Engineering (3 Credits)
Prerequisite: MATH 153. The content includes study of the development of a site including surveying, excavation, soil treatment, heavy equipment requirements, storm water management, pavement design, and construction of roadways. (Formerly 2990:246)

COET:248 Construction Graphics (3 Credits)
Introduction to terminology and drawing basics with a focus on civil/site plans, architectural and structural drawing. (Formerly 2990:248)

COET:254 Building Codes (3 Credits)
Prerequisite: COET 131. Students learn fundamental concepts for construction related to the residential building code. (Formerly 2990:254)

COET:310 Residential Building Construction (3 Credits)
Introduction to building design, wood framing, and mechanical systems as commonly found in residential housing. (Formerly 2990:310)

COET:352 Field Management & Scheduling (2 Credits)
Prerequisite: COET 245 or permission. Planning, scheduling, and controlling of field work within time and cost constraints. Manual methods and computer software packages studied. (Formerly 2990:352)

COET:354 Foundation Construction Methods (3 Credits)
Prerequisites: COET 225 and COET 237. Soil mechanics and soils exploration as related to construction. Foundation construction methods and practice in the interest of safety and suitable economy. (Formerly 2990:354)

COET:356 Safety in Construction (3 Credits)
The purpose of this course is to explain what creates hazards and why, and to suggest where to anticipate trouble in each phase of the work as it progresses. (Formerly 2990:356)

COET:358 Advanced Estimating (3 Credits)
Prerequisite: COET 245. This course focuses on estimating and bidding for public and private construction. Includes heavy/highway, residential and building construction with use of computer software to facilitate bid price. (Formerly 2990:358)

COET:361 Construction Formwork (3 Credits)
Prerequisite: COET 234 or permission. Introduction to design and construction of formwork and temporary wood structures. (Formerly 2990:361)
COET:362 Advanced Elements of Structures (3 Credits)  
Prerequisite: COET 234. This course examines advanced topics in structural engineering and is an extension of Elements of Structures. (Formerly 2990:362)

COET:371 Green & Sustainable Building Practices (3 Credits)  
This course is designed to provide an understanding of sustainable construction practices and their importance on environmental issues. (Formerly 2990:371)

COET:421 Risk Management and Contract Strategies (3 Credits)  
Prerequisite: Admission to the BSCET program, or permission from program director. This course focuses on current trends and challenges related to construction contracting. Students will learn critical “issue spotting” skills in areas of construction risk management, loss avoidance, collaboration, and strategic thinking. (Formerly 2990:421)

COET:422 Leveraging Technology in Construction (3 Credits)  
Prerequisite: Admission to the BSCET program, or permission from program director. This course will describe how to use emerging trends and technologies to improve project outcomes. Topics include digital and computing technologies - BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, blockchain, simulation, augmented reality, data standards and interoperability, and vertical and horizontal integration, industrial production - prefabrication, 3D printing and assembly, offsite manufacture, cyber-physical systems - actuators, sensors, IoT, robots, cobots, and drones. (Formerly 2990:422)

COET:442 Lean Building Science (3 Credits)  
Prerequisite: Admission to the BSCET program. This course is designed to provide an understanding of collaborative leadership and lean building science as it relates to job site construction safety, building first cost, schedule, ongoing building operating expenses, and upcycle construction benefits. Students will work in classroom and workshop settings led by construction industry leaders and subject matter experts. There will also be the opportunity to experience job site application of these practices. Core concepts will be taught through a variety of methods, such as learning checks, peer presentations, videos, social media posts and smaller group projects. Students will learn a variety of tools they can apply immediately to their work to reduce waste and improve the overall efficacies of their organizations. (Formerly 2990:442)

COET:453 Legal Aspects of Construction (2 Credits)  
Prerequisite: Admission into the BCET program or permission. Study of business of contracting and subcontracting and legal problems therein such as breach, partial performance, payment, insolvency, subsurface. Review of standard contracts and construction industry rules of arbitration. (Formerly 2990:453)

COET:462 Mechanical Service Systems (3 Credits)  
Introduction to materials and equipment used in mechanical heating, ventilating, air conditioning, water and waste systems. (Formerly 2990:462)

COET:463 Electrical Service Systems (3 Credits)  
Introduction to materials and equipment in electrical systems of buildings. Includes illumination, electrical sources, materials and distribution. Emphasis of fire safety. (Formerly 2990:463)

COET:465 Heavy Construction Estimating (3 Credits)  
Prerequisite: COET 245. Quantity takeoffs and cost analysis to include methods, systems, and equipment relevant to heavy highway and civil infrastructure projects. (Formerly 2990:465)

COET:466 Hydraulics (3 Credits)  
Prerequisite: Junior or greater standing. Pre/Corequisite: MATH 356. Introduction to hydrology. Flow in closed conduits and open channels, distribution, systems, storage requirements and basic concepts of hydraulic structures. Basic concepts of seepage and working knowledge of pumps. (Formerly 2990:466)

COET:468 Construction Management (3 Credits)  
Prerequisites: COET 352 and COET 358. Construction Management takes established construction practices, current technological advances, and latest management methods and makes them into an efficient, smooth working system. (Formerly 2990:468)

Gen Ed: - Capstone

COET:469 Contracts and Specifications (3 Credits)  
Prerequisite: Admission to BSCET program or permission. This course studies the principles and applications of construction specifications, contracts, processes for managing professional risk and increasing economic performance of the construction process. (Formerly 2990:469)

COET:471 Understanding LEED Guidelines (3 Credits)  
Prerequisite: COET 371. Provides an understanding of LEED guidelines and requirements and help prepare the student for the LEED associate exam. (Formerly 2990:471)

COET:479 CPC Seminar (3 Credits)  
Prerequisite: Senior standing in a BS Degree in Construction Engineering Technology or permission. This course prepares students for the content and format of the Certified Professional Constructor’s Examination. (Formerly 2990:479)

COET:489 Special Topics in Construction (1-3 Credits)  
Prerequisite: Permission of instructor. (May be repeated for up to six credits.) Special lecture/laboratory courses offered once or only occasionally in areas where no formal courses exist. (Formerly 2990:489)

COET:490 Workshop in Construction (1-3 Credits)  
Prerequisites: Permission. Group studies of special topics in construction. May not be used to meet undergraduate major requirements in construction. May be used for elective credit only. (May be repeated for up to six credits) (Formerly 2990:490)

COET:497 Honors Project (1-3 Credits)  
Prerequisite: Senior standing in Honors College and permission of supervising faculty in student’s degree field and pursuit of major in CET. Individual Senior Honor’s Project relevant to student’s major field of study. Specific projects are approved and supervised by a designated member of the faculty in the student’s degree field. (Formerly 2990:497)

COET:498 Independent Study in Construction (1-3 Credits)  
Prerequisite: Permission. Directed study in a special field of interest chosen by student in consultation with instructor. (May be repeated for up to six credits) (Formerly 2990:498)

Civil Engineering (CIVE)

CIVE:101 Introduction to Civil Engineering Fundamentals (3 Credits)  
Corequisite: MATH 149 or higher math or appropriate AP test score. Introduction to Civil Engineering. Basic concepts of civil engineering practice including communication skills, problem solving skills, professional ethics/goals, and teamwork. Introduction to professional level software including spreadsheets, database, and mathematical computation. (Formerly 4300:101)
CIVE:102 Tools for Civil Engineering (3 Credits)
Prerequisite: CIVE 101. Building on concepts of engineering practices learned in Tools I further developing communication skills, problem solving skills, professional ethics/goals, statistics and model-building, and team work. Advanced use of professional level software including CAD, MATLAB and Excel. (Formerly 4300:102)

CIVE:201 Statics (3 Credits)
Corequisites: MATH 222 and PHYS 291. Forces, resultants, couples; equilibrium of force systems; distributed forces; centers of gravity, analysis of simple structures; moments of inertia; kinematics. (Formerly 4300:201)

CIVE:202 Introduction to Mechanics of Solids (3 Credits)
Prerequisite: CIVE 201. Axial force, bending moment diagrams, axial stress and deformation; stress-strain diagrams; torsion; flexural stress; flexural shearing stress; compound stresses; indeterminate beams; columns. (Formerly 4300:202)

CIVE:306 Theory of Structures (3 Credits)
Prerequisite: CIVE 202. Stability and determinacy; statically determinate trusses and frames; approximate frame analysis influence lines; moving loads; virtual work analysis; moment area theorem; theorem of three moments; moment distribution for continuous beams and frames. (Formerly 4300:306)

CIVE:313 Soil Mechanics (3 Credits)
Prerequisites: CIVE 202 and admission to an engineering major within the College of Engineering and Polymer Science or permission. Physical properties of soils. Soil water and groundwater flow. Stresses, displacements, volume changes, consolidation within a soil mass. Soil strength. Compaction. (Formerly 4300:313)

CIVE:314 Foundation Design (3 Credits)
Prerequisites: CIVE 313 and full admission to an engineering major in the College of Engineering and Polymer Science. Subsurface exploration, shallow foundations, earth retaining structures, deep foundations. (Formerly 4300:314)

CIVE:321 Introduction to Environmental Engineering (3 Credits)
Prerequisites: CHEM 153 and MATH 222. Basic principles of ecosystems, microbiology, chemical reactions, and material flow that environmental engineers use to protect our water, air and soil. (Formerly 4300:321)

CIVE:323 Water Supply & Pollution Control (3 Credits)
Prerequisite: CIVE 321 and admission to an engineering major within the College of Engineering and Polymer Science. Pre/Corequisite: MATH 335. Water and wastewater characteristics, criteria, quantities and distribution. Water and wastewater treatment process flowsheets, design and operation. Wastewater and residual disposal. (Formerly 4300:323)

CIVE:341 Hydraulic Engineering (3 Credits)
Prerequisites: MECE 310 and admission to an engineering major within the College of Engineering and Polymer Science. This course will focus on presentation and application of fundamental hydraulic principles in both the classroom and laboratory. Examination of flow in pipelines and pipe networks, pumps and pumping stations, hydrology, flow in open channels, groundwater hydraulics, and design of hydraulic structures will be studied. Emphasis will be placed on proper application of principles, data interpretation and analysis, problem solving, and report writing. (Formerly 4300:341)

CIVE:361 Transportation Engineering (3 Credits)
Prerequisites: Junior standing and admission to an engineering major within the College of Engineering and Polymer Science. Introductory survey of transportation topics including transportation planning requirements and techniques, introduction to design of highways, airports and railroads and introduction to traffic engineering. (Formerly 4300:361)

CIVE:380 Engineering Materials Laboratory (3 Credits)
Prerequisites: CIVE 202 and admission to an engineering major within the College of Engineering and Polymer Science. Fundamentals and applications of materials science, mechanics of solids and study of laboratory instrumentation and standard techniques in testing of engineering materials. (Formerly 4300:380)

CIVE:401 Steel Design (3 Credits)
Prerequisites: CIVE 306 and admission to an engineering major within the College of Engineering and Polymer Science. Tension, compression members; open web joists; beams; bearing plates; beam-columns; bolted, welded connections. (Formerly 4300:401)

CIVE:403 Reinforced Concrete Design (3 Credits)
Prerequisites: CIVE 306 and admission to an engineering major within the College of Engineering and Polymer Science. Ultimate strength analysis and design; compression steel; diagonal tension; stirrups; development length; one-way slab; T-beams; two-way slabs; columns; isolated and combined footings. (Formerly 4300:403)

CIVE:404 Advanced Structural Design (3 Credits)
Prerequisites: CIVE 401 and CIVE 403. Composite design; plate girders; plastic design; cantilever retaining walls; torsion in R/C members; deflection of R/C members; continuous girder bridge design. (Formerly 4300:404)

CIVE:407 Advanced Structural Analysis (3 Credits)

CIVE:414 Design of Earth Structures (3 Credits)
Prerequisite: CIVE 314 or permission. Design of earth structures: dams, highway fills, cofferdams, etc. Embankment construction techniques, quality control, embankment analysis, instrumentation, foundation soil stabilization, seepage analysis and control. Design problem. Graduate students will perform more advanced analysis and design. (Formerly 4300:414)

CIVE:418 Soil & Rock Exploration (3 Credits)
Prerequisite: CIVE 314 or permission. Site exploration criteria and planning. Conventional boring, sampling and in situ testing methods. Theory and application of geophysics and geophysical methods including seismic, electrical resistivity, gravity, magnetic and radioactive measurements. Air photo interpretation. (Formerly 4300:418)

CIVE:423 Chemistry for Environmental Engineers (3 Credits)
Prerequisite: One year of college chemistry. General, physical, organic biochemistry, equilibrium, and colloid chemistry concepts applied to Environmental Engineering. Concepts are used in water and wastewater laboratory. (Formerly 4300:423)

CIVE:424 Water-Wastewater Laboratory (1 Credit)
Corequisite: CIVE 323 or permission. Analysis of water and wastewater. (Formerly 4300:424)
CIVE:426 Environmental Engineering Design (3 Credits)
Prerequisite: CIVE 323. An introduction to the physical, chemical and biological processes utilized in the treatment of water and wastewater, with design parameters emphasized. (Formerly 4300:426)

CIVE:427 Water Quality Modeling & Management (3 Credits)
Prerequisite: CIVE 323. Analysis and simulation of the physical, chemical and biochemical processes affecting stream quality. Development of management strategies based upon the application of water quality modeling techniques to environmental systems. (Formerly 4300:427)

CIVE:428 Hazardous & Solid Wastes (3 Credits)
Prerequisite: Senior standing or permission of instructor. Hazardous and solid waste quantities, properties and sources are presented. Handling, processing, storage and disposal methods are discussed with non-technical constraints outlined. (Formerly 4300:428)

CIVE:441 Hydraulic Design (3 Credits)
Prerequisite: CIVE 341. Collection and critical evaluation of hydraulic data related to actual design problem selected by instructor. Development and analysis of design alternatives. Preparation of reports. (Formerly 4300:441)

CIVE:443 Applied Hydraulics (3 Credits)
Prerequisites: CIVE 341 and admission to an engineering major within the College of Engineering and Polymer Science. Review of design principles: urban hydraulics, stream channel mechanics, sedimentation, coastal engineering. (Formerly 4300:443)

CIVE:445 Hydrology (3 Credits)
Prerequisite: CIVE 341. Surface water hydrology, water cycle, precipitation, evaporation, stream flow. Principles of hydrologic systems and their analysis. Hydrologic simulation, reservoir planning and water supply studies. Analysis of rainfall and floods. (Formerly 4300:445)

CIVE:448 Hydraulics Laboratory (1 Credit)
Prerequisite: CIVE 341. Introduction to laboratory and field devices for hydraulic measurements. Reduction and presentation of hydraulic data. Individual assignments of model studies of hydraulic structures. (Formerly 4300:448)

CIVE:450 Urban Planning (2 Credits)
Historical developments in urban planning; urban planning techniques and patterns; comprehensive master planning studies; planning regulations; design problems; class projects; class project presentation. (Formerly 4300:450)

CIVE:451 Computer Methods of Structural Analysis (3 Credits)
Prerequisite: CIVE 306. Computer methods of structural analysis. Finite element software and interactive graphics. Stiffness concepts and matrix formulation of beams; modeling of simple and complex structural systems; vibration analysis using microcomputers. (Formerly 4300:451)

CIVE:452 Structural Vibrations & Earthquakes (3 Credits)
Prerequisite: CIVE 306. Vibration and dynamic analysis of structural systems with one, two, or more degrees of freedom; beams, frames, buildings and bridges. Numerical methods of analysis. Elastic-plastic systems. Earthquake analysis of design. Earthquake codes. (Formerly 4300:452)

CIVE:453 Optimum Structural Design (3 Credits)
Prerequisite: CIVE 306. Basic concepts in structural optimization. Mathematical programming methods including unconstrained minimization, multidimensional minimization and constrained minimization. (Formerly 4300:453)

CIVE:454 Advanced Mechanics of Materials (3 Credits)
Prerequisite: CIVE 202 or equivalent. Three-dimensional state of stress and strain analysis. Unsymmetric bending of straight and curved members with shear deformation. Beams on elastic foundations. Saint Venant's torsional problems. Inelastic analysis of bending and torsional members. Introduction to energy method. Instability behavior of prismatic members. (Formerly 4300:454)

CIVE:463 Transportation Planning (3 Credits)
Prerequisite: CIVE 361. Theory and techniques for development, analysis and evaluation of transportation system plans. Emphasis on understanding and using tools and professional methods available to solve transportation planning problems, especially in urban areas. (Formerly 4300:463)

CIVE:464 Highway Design (3 Credits)
Prerequisite: CIVE 361. Study of modern design of geometrical and pavement features of highways. Design problem and computer use. Graduate students will produce a more complete design. (Formerly 4300:464)

CIVE:465 Pavement Engineering (3 Credits)
Prerequisite: CIVE 361. Theories of elasticity, of viscoelasticity and of layered systems as applied to pavements. Pavement materials characterization; pavement design, pavement restoration for rigid and flexible pavements. (Formerly 4300:465)

CIVE:466 Traffic Engineering (3 Credits)
Prerequisite: CIVE 361. Vehicle and urban travel characteristics, traffic flow theory, traffic studies, accidents and safety, traffic signs and marking, traffic signal planning, traffic control and transportation administration. (Formerly 4300:466)

CIVE:467 Advanced Highway Design (3 Credits)
Prerequisites: CIVE 464, autoCAD capability, or permission. Computer-aided geometrical design of highways including survey data input, digital terrain modeling, cross-section templates, horizontal and vertical roadway design, earthwork computations, and advanced topics. (Formerly 4300:467)

CIVE:468 Highway Materials (3 Credits)
Prerequisites: CIVE 361 and CIVE 380 or permission. Properties of aggregates, manufacture and properties of portland cement concrete, properties of asphaltic materials, design and testing of hot mix asphalt pavement mixtures and of surface treatments. Laboratory preparation of specimens and determination of properties. Graduate student requirement: Graduate students will be required to perform an additional eight-hour asphalt laboratory (Abson recovery of asphalt from solution) and to produce a paper on a highway materials topic. (Formerly 4300:468)

CIVE:471 Construction Administration (3 Credits)
Prerequisites: Junior standing and full admission to an engineering major in the College of Engineering and Polymer Science. Construction management functions, scheduling techniques for construction projects, scheduling PERT networks and linear operations, estimating building projects, construction contracts and legal structure, construction finance, engineering economics, equipment productivity, machine power, equipment selection and utilization, equipment cost, construction safety, construction trends, LEED construction. (Formerly 4300:471)

CIVE:472 Construction Engineering (3 Credits)
Prerequisite: Senior standing or permission. Construction equipment selection and management. Techniques of various engineering construction operations including blasting, tunneling, concrete framework and dewatering. (Formerly 4300:472)
CIVE:473 Construction Materials (2 Credits)
Prerequisites: CIVE 380 and CHEE 305. Composition, structure and mechanical behavior of structural materials such as concrete, wood, masonry, plastics and composite materials. Discussion of applications and principles of evaluating material properties. (Formerly 4300:473)

CIVE:474 Underground Construction (2 Credits)
Prerequisite: CIVE 314. Description of practices and techniques of underground construction. Selection of proper method for individual job. Design of underground openings, support systems and linings. (Formerly 4300:474)

CIVE:480 Reliability-Based Design (4 Credits)
Prerequisite: STAT 261 and senior standing. Probability concepts in civil engineering. Risk analysis and reliability based design. (Formerly 4300:480)

CIVE:482 Special Projects: Civil Engineering (1-3 Credits)
Prerequisites: Senior standing and permission. Directed individual or group research or study in student's field of interest. Topic subject to approval by adviser. (Formerly 4300:482)

CIVE:489 Fundamental of Engineering Exam Review (0 Credits)
Prerequisite: Senior standing. This course is intended to prepare civil engineering students for the Fundamentals of Engineering Exam, which is to be taken prior to graduation. (Formerly 4300:489)

CIVE:490 Senior Design in Civil Engineering (3 Credits)
Prerequisites: CIVE 323, CIVE 341, CIVE 361, CIVE 403, senior standing and admission to an engineering major within the College of Engineering and Polymer Science. Pre/Corequisites: CIVE 314 and CIVE 401. A civil engineering design project that emphasizes interdisciplinary teamwork to solve a substantial, currently relevant problem. (Formerly 4300:490)

Gen Ed: Capstone

CIVE:497 Honors Project (1-3 Credits)
(5 may be repeated for a total of six credits) Prerequisite: Senior standing in Honors Program. Individual creative project or design relevant to civil engineering, supervised by faculty member of the department. (Formerly 4300:497)
