

CONSTRUCTION MATERIALS TESTING, CERTIFICATE

Certificate in Materials Testing (299106C)

The purpose of the certificate program in Materials Testing is to train individuals in the processes and procedures involved in standardized laboratory testing of construction related materials. This certificate may be earned independently of earning a degree, but all coursework can be applied to an AAS degree or the BS degree in Construction Engineering.

The following information has official approval of **The Department of Engineering and Science Technology** and **The College of Engineering and Polymer Science**, but is intended only as a guide. Completion of this certificate is contingent upon many factors, including but not limited to: class availability, total number of required credits, work schedule, finances, family, course drops/withdrawals, successfully passing courses, prerequisites, among others.

The following courses constitute a "Certificate in Materials Testing" and must be completed with a minimum grade point average of 2.0 overall for the certificate to be noted on the student's record.

Summary

Code	Title	Hours
Required Courses		16
Total Hours		16

Required Courses

Code	Title	Hours
2990:125	Statics	3
2990:225	Strength of Materials	3
2990:237	Materials Testing I	2
2990:238	Materials Testing II	2
2990:354	Foundation Construction Methods	3
2990:246	Site Engineering	3
Total Hours		16
