The College of Engineering provides educational opportunities at both the undergraduate and graduate levels for students who wish to pursue careers in engineering. The faculty in the College of Engineering perform research with the purpose of contributing new knowledge to the fields encompassed by engineering principles. Professional service is in concert with the objectives of the University.

The College's co-operative education program, one of the oldest in the nation, enables student engineers to integrate classroom learning with on-the-job experience while they earn their degrees. Students can alternate semesters of paid employment in their major fields of interest with semesters on campus after they have completed five semesters of study.

The College offers eight undergraduate programs leading to Bachelor of Science degrees.

- Aerospace Systems Engineering (offered in the Department of Mechanical Engineering)
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Corrosion Engineering
- Electrical Engineering
- Mechanical Engineering

College Admission Requirements

Admission for Incoming First-Year Students

A new first-year student can receive full admission to the College of Engineering directly from high school if they meet the following requirements:

- High school GPA of 3.4 or higher
- At least 24 composite ACT or at least 1110 composite SAT
- At least 24 math ACT or at least 560 math SAT

Students interested in engineering who do not meet the academic requirements for direct admission to the College of Engineering are admitted to The University of Akron as a student with an intended major in engineering, with a pre-admission status. Once a student with pre-admission status meets the admission criteria shown below, that student receives full admission to the College of Engineering.

Admission for Current UA Students and Transfer Students

Current UA students who have not yet been admitted to the College of Engineering and students transferring to UA from another institution may apply for the College of Engineering when they meet the following criteria:

- Complete at least 30 semester hours of coursework post high school
- Complete Calculus 2 with a C- or higher
- Have a 2.3 grade point average in at least three of the following categories:
  - in all coursework
  - in all engineering coursework
  - in all required mathematics coursework
  - in all required science coursework (chemistry, physics, computer science, biology)

Admission of students who do not meet the above requirements will be considered by the dean or representative only if the request originates by an Engineering department head or representative.

There are additional requirements for full admission to the Aerospace Systems Engineering program.

Continuation in the Baccalaureate Programs

Probation/Suspension/Dismissal in Engineering

A student's term and cumulative GPA determine whether a student is in good academic standing in the College of Engineering. Evaluation of status is updated at the end of term. Students not in good academic standing in Engineering may be on engineering probation, engineering suspension, or dismissed from the College of Engineering. Specific details on the process are found at College of Engineering Academic discipline (probation, suspension, and dismissal) policy (https://www.uakron.edu/engineering/docs/College%20of%20Engineering%20Academic%20Probation%20and%20Dismissal%20Fall%202018.pdf).

Engineering students are also subject to University of Akron probation and dismissal policies (https://bulletin.uakron.edu/undergraduate/important-policies/grade-policy-credit).

Requirements for Graduation

- Compliance with University requirements
- Completion of all degree requirements for the specific engineering program, including both the appropriate list of courses and a minimum (depending on program) of 136-140 credits of coursework
- Recommendation of the student's department
• Achievement of 2.00 grade point average in all engineering coursework attempted with 4XXX course prefix

Engineering Accreditation
Engineering is a profession in which knowledge of mathematics and natural sciences, gained by study, experience, and practice, is applied, with judgment, to develop ways to economically utilize the materials and forces of nature for the benefit of mankind. Entrance to the engineering profession is normally through a university undergraduate program in one of the disciplines of engineering.

The University of Akron's College of Engineering is home to eight undergraduate programs accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org): Aerospace Systems Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Corrosion Engineering, Electrical Engineering, and Mechanical Engineering. Accreditation ensures that the graduates of our programs have a solid educational foundation and are ready to enter the profession. More on the importance of accreditation in engineering can be found here (http://www.abet.org/accreditation/what-is-accreditation/why-abet-accreditation-matters).

Accredited engineering programs must meet a number of criteria and have specific educational objectives. The student outcomes common to all engineering programs accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org), are that graduates have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Cooperative Education
The cooperative education program provides for a coordinated sequence of alternating periods of classroom instruction and employment during a five-year program. Students in one of Engineering's undergraduate programs may pursue their degree with the cooperative education option, for a nominal five years of study, or without cooperative education, for a nominal four years of study. The exception is Aerospace Systems Engineering; in this program, cooperative education is required.

The cooperative program simultaneously provides for the development of fundamental principles in the classroom and for their application in practice. The student has the opportunity to find the type of work and organization in which the student can best apply individual ability. The student gains an appreciation of the problems of labor and management by first-hand experience. The student develops mature judgment by coping with everyday problems. The employer of a coop student has the ability to train and select a student whose abilities and aptitudes can be adapted to the needs of technical staff requirements.

While a student is at work, all rules and regulations prescribed by the employer must be obeyed. In addition, the student is subject to all current labor laws and conditions. The student is considered a full-time student by the University while on industrial assignments.

The University does not guarantee employment, but makes every effort to place a student in the best learning situation that is consistent with the acquisition of sound professional experience.

Department of Biomedical Engineering
More information on the Department of Biomedical Engineering and the undergraduate program in Biomedical Engineering is available at:

• department Undergraduate Bulletin page (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering/biomedical-engineering)
• department website (https://www.uakron.edu/engineering/BME)

Department of Chemical and Biomolecular Engineering
More information on the Department of Chemical and Biomolecular Engineering and the undergraduate programs in Chemical Engineering and Corrosion Engineering is available at:

• department Undergraduate Bulletin page (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering/chemical-engineering)
• department website (https://www.uakron.edu/engineering/CBE)

Department of Civil Engineering
More information on the Department of Civil Engineering and the undergraduate program in Civil Engineering is available at:

• department Undergraduate Bulletin page (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering/civil-engineering)
• department website (https://www.uakron.edu/engineering/CBE)

Department of Electrical and Computer Engineering
More information on the Department of Electrical and Computer Engineering and the undergraduate programs in Electrical Engineering and Computer Engineering is available at:

• department Undergraduate Bulletin page (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering/electrical-computer)
• department website (https://www.uakron.edu/engineering/ECE)

Department of Mechanical Engineering
More information on the Department of Mechanical Engineering and the undergraduate programs in Mechanical Engineering and Aerospace Systems Engineering is available at:

• department Undergraduate Bulletin page (https://bulletin.uakron.edu/undergraduate/colleges-programs/engineering/mechanical-engineering)
• department website (https://www.uakron.edu/engineering/ME)
