

COMPUTER ENGINEERING (CPEN)

CPEN:101 Tools for Computer Engineering (3 Credits)

Pre/Corequisite: MATH 221 or MATH 149. Orientation to degree programs and design practice in electrical and computer engineering. Introduction to computer applications and resources for engineering studies. (Formerly 4450:101)

CPEN:208 Programming for Engineers (3 Credits)

Prerequisite: ELEN 101 or permission. Introduction to programming. Environment and tools. C programming language. Machine level data forms and organization. (Formerly 4450:208)

CPEN:210 Computational Problem Solving (3 Credits)

Pre/Corequisites: [CPEN 208 or CPSC 209] and MATH 335. Elements of computation required for modeling and analysis of engineering systems. Complex algebra, linear systems of equations, numerical calculus, difference and differential equations, solution of nonlinear equations. (Formerly 4450:210)

CPEN:221 Digital Logic Design (3 Credits)

Pre/Corequisites: ELEN 101 or CPEN 101 or BMEN 101. Boolean algebra and simplification of logic functions. Combinational and sequential circuits. Finite-state machine descriptions. (Formerly 4450:221)

CPEN:222 Digital Logic Design Laboratory (1 Credit)

Pre/Corequisite: CPEN 221. Design of digital systems with hardware description language and simulation. (Formerly 4450:222)

CPEN:301 Undergraduate Research I: Computer Engineering (1 Credit)

Prerequisites: completion of [ELEN 101 or CPEN 101], ELEN 230, ELEN 231, ELEN 330, ELEN 332 and CPEN 220 with a combined average grade of 3.0 or higher; admission to an engineering major within the College of Engineering and Polymer Science, and permission. Research project, supervised by faculty member of the department; requires oral research presentation and written report. (Formerly 4450:301)

CPEN:302 Undergraduate Research II: Computer Engineering (1 Credit)

Prerequisites: [ELEN 301 or CPEN 301], admission to an engineering major within the College of Engineering and Polymer Science, and permission. Research project, supervised by faculty member of the department; requires oral research presentation and written report. (Formerly 4450:302)

CPEN:303 Undergraduate Research III: Computer Engineering (1 Credit)

Prerequisites: [ELEN 302 or CPEN 302], admission to an engineering major within the College of Engineering and Polymer Science, and permission. Research project, supervised by faculty member of the department; requires oral research presentation and written report to the department, and presentation of work in a research venue outside the department. (Formerly 4450:302)

CPEN:304 Undergraduate Research IV: Computer Engineering (1 Credit)

(May be repeated. May not be applied to degree requirements.) Prerequisite: CPEN 303 or ELEN 303, and permission. Research project, supervised by faculty member of the department; requires oral research presentation and written report. (Formerly 4450:304)

CPEN:309 Design Project Seminar - Computer Engineering (1 Credit)

Prerequisites: Junior or higher standing and admission to an engineering major within the College of Engineering and Polymer Science. Pre/Corequisites: [CPSC 426 or CPEN 325], CPEN 367, [CPEN 420 or CPEN 427], CPEN 422, and CPEN 440. Engineering capstone project selection and proposal, including preliminary technical specifications. Professional ethics. Intellectual property. Societal impact issues in engineering design. (Formerly 4450:309)

CPEN:320 Computer Systems (3 Credits)

Prerequisites: [CPSC 209 or CPEN 208] and [CPEN 220 or CPEN 221 or MATH 208]. Introduces the design and architecture of modern computer systems. Data and instruction representation. Conventional computer organization. Hardware and software design processes. The hardware/software interface. (Formerly 4450:320)

CPEN:325 Operating Systems Concepts (3 Credits)

Prerequisites: CPEN 320, CPSC 210. Processes and threads. Process communication and resource sharing. Deadlock resolution. Memory management. File systems. Introduction to network operating systems. (Formerly 4450:325)

CPEN:367 VLSI Design (3 Credits)

Prerequisites: ELEN 360 and admission to an engineering major within the College of Engineering and Polymer Science. Digital logic circuits. Very large scale integration (VLSI) fabrication processes and layout design. Delay and power of digital circuits. Latches and flip-flops in VLSI. Memory design. System-level design issues. Design project. (Formerly 4450:367)

CPEN:401 Senior Design Project I - Computer Engineering (3 Credits)

Prerequisites: CPEN 309, senior standing, admission to an engineering major within the College of Engineering and Polymer Science, and completion of [CPSC 426 or CPEN 325], CPEN 367, [CPEN 420 or CPEN 427], CPEN 422, and CPEN 440 with a combined average grade of 2.0 or higher. Design and preparation phase of an engineering team project. System specification, design, and simulations; ordering of components; subsystem implementations. Requires project presentations and report. (Formerly 4450:401)

Gen Ed: - Capstone

CPEN:402 Senior Design Project II - Computer Engineering (3 Credits)

Prerequisites: CPEN 401 and admission to an engineering major within the College of Engineering and Polymer Science. Implementation and evaluation phases of an engineering design project. Requires a project presentation and report. (Formerly 4450:402)

Gen Ed: - Complex Issues Facing Society

CPEN:410 Embedded Scientific Computing (3 Credits)

Prerequisites: [CPEN 208 or CPSC 209] and ELEN 340. Fixed point, floating point representation and coding. Processor/DSP implementations. Assemblers, C language semantics. Adapting scientific library routines for embedded use. Minimizing complexity. Ill-conditioned problems. (Formerly 4450:410)

CPEN:415 System Simulation (3 Credits)

Prerequisite: ELEN 371 or CPEN 440. Computer simulation of dynamic systems. Discrete system stability, linear multistep and Runge-Kutta methods, nonlinear systems, stiff systems, distributed systems and real-time computing. (Formerly 4450:415)

CPEN:420 Computer Systems Design (3 Credits)

Prerequisite: CPEN 320. Design of advanced processors at the microarchitecture level. Pipelining. Superscalar, vector and VLIW architectures. Instruction-level parallelism. Compiler support. Multiprocessor architectures. (Formerly 4450:420)

CPEN:422 Embedded Systems Interfacing (3 Credits)

Prerequisites: [CPSC 209 or CPEN 208], [CPEN 221 or CPEN 220], ELEN 332 and admission to an engineering major within the College of Engineering and Polymer Science. Microcontroller structures and embedded peripherals. Interfaces to physical environments. Software access to peripherals including timers, ADCs and DACs. Synchronous and asynchronous communications. Interrupts. Real-time operating systems. (Formerly 4450:422)

CPEN:427 Computer Networks (3 Credits)

Prerequisite: CPEN 320; CPEN 325 or CPSC 426. Network architecture and protocol layering. Network design principles, communication protocols, and performance measures. Socket programming, routing, error detection and correction, access control, multimedia networking. (Formerly 4450:427)

CPEN:440 Digital Signal Processing (3 Credits)

Prerequisites: ELEN 340 and admission to an engineering major within the College of Engineering and Polymer Science. Signal sampling and reconstruction; data-converter models. Unilateral and bilateral z transforms. Discrete Fourier Transform (DFT); Fast Fourier Transform (FFT). Digital filter structures and design methods. (Formerly 4450:440)

CPEN:462 Analog Integrated Circuit Design (3 Credits)

Prerequisite: ELEN 360. CMOS processes and layout; amplifiers, current mirrors, and comparators; current, voltage, and bandgap references; switched capacitor circuits. Frequency and noise analysis techniques. (Formerly 4450:462)

CPEN:465 Programmable Logic (3 Credits)

Prerequisites: [CPEN 220 or {CPEN 221 and CPEN 222}], and [CPSC 209 or CPEN 208]. Digital design with programmable devices. PLD and FPGA architectures. Logic design and technology mapping tools. (Formerly 4450:465)

CPEN:467 VLSI Circuits & Systems (3 Credits)

Prerequisite: CPEN 367. High performance adders and multipliers for very large scale integration (VLSI) systems. Architectural synthesis. Design for high performance, low power, and testability. (Formerly 4450:467)

CPEN:498 Special Topics: Computer Engineering (1-3 Credits)

(May be taken more than once) Prerequisite: Permission of department chair. Special topics in computer engineering. (Formerly 4450:498)
