**BIOMEDICAL ENGINEERING (BMEN)**

**BMEN:100 Introduction to Biomedical Engineering (1 Credit)**
Pre/Corequisite: MATH 221 or appropriate AP score. Introduction to Biomedical Engineering and resources available on campus for academic and career success. (Formerly 4800:100)

**BMEN:101 Tools for Biomedical Engineering (2 Credits)**
Pre/Corequisite: MATH 221 or appropriate AP score for Calculus placement. Introduction to logic and problem solving using the Matlab environment; engineering drawing and graphics using Solidworks with specific emphasis on biomedical engineering problems. (Formerly 4800:101)

**BMEN:111 Introduction to Biomedical Engineering Design (3 Credits)**
Prerequisite: BMEN 101. Prerequisite or Corequisite: MATH 222. Introduction to interdisciplinary nature of Biomedical Engineering research and design through the use of lectures, discussions, homework, and design projects. (Formerly 4800:111)

**BMEN:201 Biomedical Engineering Sophomore Seminar (1 Credit)**
Prerequisites: BMEN 101 and sophomore or greater standing. A seminar format to allow students to learn about current research and careers in Biomedical Engineering. Topics in technical communications will also be covered. (Formerly 4800:201)

**BMEN:220 Biomedical Computing (3 Credits)**
Prerequisites: MATH 223, BMEN 101 and admission to an engineering major within the College of Engineering and Polymer Science. Corequisite: MATH 335. Programming in Matlab environment to solve engineering problems using built-in and user-defined functions and various modules including signal processing and image processing. Concepts will be illustrated using relevant biomedical engineering examples. (Formerly 4800:220)

**BMEN:291 Biomedical Engineering Design Principles I (1 Credit)**
Prerequisite: BMEN 101. Corequisite: MATH 222. Introduction to basic BME design principles including: the engineering design process and additive manufacturing for devices. (Formerly 4800:291)

**BMEN:292 Biomedical Engineering Design Principles II (1 Credit)**
Prerequisite: BMEN 101. Corequisite: MATH 335. Introduction to basic BME design principles including: the engineering design process, medical device regulations/standards and subtractive manufacturing for devices. (Formerly 4800:292)

**BMEN:300 Biomaterials (3 Credits)**
Prerequisites: CIVE 202 and admission to an engineering major within the College of Engineering and Polymer Science. Properties of materials used in medicine and their interaction with biological materials will be discussed. Biocompatibility issues and materials properties and characterization will also be discussed. (Formerly 4800:300)

**BMEN:305 Introduction to Biophysical Measurements (4 Credits)**
Prerequisites: BMEN 101 and ELEN 231 or ELEN 307 and admission to an engineering major within the College of Engineering and Polymer Science. Corequisite: BIOL 202. Biomedical Engineering involves measurement of Physiological processes in living organisms. An understanding of the variety of instruments used and the limitations are introduced. (Formerly 4800:305)

**BMEN:307 Bioelectronics Lab (1 Credit)**
Prerequisite: Admission to Biomedical Engineering. Pre/Corequisite: ELEN 307. Introduction to circuit principles as applied to biomedical instrumentation including: components, measurement instrumentation, power supplies, and prototype boards. Students will design, build, and troubleshoot basic biomedical circuits, take measurements, and analyze the outputs. (Formerly 4800:307)

**BMEN:310 Modeling & Simulation of Biomedical Systems (3 Credits)**
Prerequisites: MATH 335, BMEN 220, and admission to an engineering major within the College of Engineering and Polymer Science. Modeling and simulation of physiological systems. (Formerly 4800:310)

**BMEN:315 Biomechanics & Biomaterials Lab (2 Credits)**
Prerequisite: Admission to Biomedical Engineering. Pre/Corequisites: BMEN 300 and BMEN 365. Laboratory experience that applies concepts and practices in biomechanics and biomaterials. (Formerly 4800:315)

**BMEN:325 Design of Medical Devices (3 Credits)**
Prerequisites: Junior/senior standing in the College of Engineering and Polymer Science or the College of Arts and Sciences. Design of Medical Devices, design criteria, human factors, patient care and monitoring devices, surgical devices, bench testing and legal liability. (Formerly 4800:325)

**BMEN:360 Biofluid Mechanics (3 Credits)**
Prerequisites: MATH 335, CHEM 153, PHYS 292, and MECE 203. Introduction to the fundamentals of fluid mechanics and their application to biological, cardiovascular, respiratory and other biofluid systems. (Formerly 4800:360)

**BMEN:362 Transport Fundamentals for Biomedical Engineering (3 Credits)**
Prerequisite: MATH 335, MECE 203 and admission to an engineering major within the College of Engineering and Polymer Science. Introductory topics in fluid, heat, and mass transfer including both integral and differential analysis as it applies to biological and biomedical systems. (Formerly 4800:362)

**BMEN:365 Mechanics for Biological Systems (3 Credits)**
Prerequisites: Admission to Biomedical Engineering and CIVE 201. This course addresses biomechanics, with an emphasis on reviews of statics and introduction to strength of materials that are relevant to biological systems. This course will give you the opportunity to understand how mechanical engineering principles are applied to physiology and physiopathology (medical problems). (Formerly 4800:365)

**BMEN:370 Biomechanics of Human Movement (3 Credits)**
Prerequisites: BIOL 202 and MECE 203. The application of engineering mechanics and anatomy to study and analyze human movement. Lectures and in-class labs will introduce students to experimental and theoretical techniques. (Formerly 4800:370)

**BMEN:391 Biomedical Engineering Regulatory Process (1 Credit)**
Prerequisite: Admission to Biomedical Engineering and BMEN 291. Pre/Corequisite: BMEN 292. Basic BME design principles including medical device regulations and standards, FDA regulatory processes, and clinical trials. (Formerly 4800:391)

**BMEN:392 BME Design Project Needs Analysis (1 Credit)**
Prerequisites: Admission to Biomedical Engineering and BMEN 391. Establish problem statement/clinical need, research project, and develop proposal and timeline for project. (Formerly 4800:392)
BMEN:420 Biomedical Signal & Image Processing (3 Credits)
Prerequisites: CPEN 220 and admission to an engineering major within the College of Engineering and Polymer Science. Corequisite: BMEN 305. Introduction to the basic problems associated with biological signal and image processing applications, and appropriate approaches to dealing with them. (Formerly 4800:420)

BMEN:422 Physiological Control Systems (3 Credits)
Prerequisites: BIOL 202, MATH 335. The basic techniques employed in control theory, systems analysis and model identification as they apply to physiological systems. (Formerly 4800:422)

BMEN:430 Design of Medical Imaging Systems (3 Credits)
Prerequisites: BIOL 200, PHYS 292, ELEN 340, ELEN 353, BMEN 305 and admission to an engineering major within the College of Engineering and Polymer Science or permission of instructor. Physical principles and engineering design of medical imaging systems, with emphasis on digital radiography, computed tomography, nuclear medicine, ultrasound and magnetic resonance. (Formerly 4800:430)

BMEN:435 Image Science (3 Credits)
Prerequisites: BIOL 200, PHYS 292, ELEN 340 or by permission of instructor. Principles of image science, image performance parameters and image assessment techniques of medical imaging systems, with emphasis on digital radiography, tomographic imaging, ultrasound and magnetic resonance. (Formerly 4800:435)

BMEN:437 Physics of Medical Imaging (3 Credits)
Prerequisites: BIOL 200, PHYS 292, ELEN 353, BMEN 305. Physical principles of medical imaging modalities with emphasis on the properties, generation mechanisms and interaction of radiation with matter, physics of the image formation and optimization. (Formerly 4800:437)

BMEN:440 Advanced Biomaterials (3 Credits)
Prerequisites: BMEN 300 and admission to an engineering major within the College of Engineering and Polymer Science. The interactions between biomaterials and medical devices will be analyzed with respect to their potential fractionation of biological mechanisms. (Formerly 4800:440)

BMEN:445 Experimental Techniques in Biomaterials Tissue Engineering (3 Credits)
Prerequisite: BMEN 440. Laboratory experience that applies engineering concepts and practices to the analysis of biomaterials and tissue engineering. (Formerly 4800:445)

BMEN:450 Tissue Engineering (3 Credits)
Prerequisites: BMEN 300, BMEN 365, BMEN 362, and [BMEN 360 or CHEE 321]. This course will explore topics to successfully design tissue engineered devices. For advanced engineering students with a background in materials, mechanics, and transport phenomena. (Formerly 4800:450)

BMEN:455 Biotransport (3 Credits)
Prerequisites: BIOL 202, BMEN 220, and [BMEN 362 or CHEE 321]. With the foundations of fluid, heat and mass transfer established, this course focuses on specific biological examples of transport phenomena. (Formerly 4800:455)

BMEN:460 Experimental Techniques in Biomechanics (3 Credits)
Prerequisites: BMEN 362, BMEN 365 and admission to an engineering major within the College of Engineering and Polymer Science. Principles of testing and measuring devices commonly used for biomechanics studies. Laboratories for demonstration and hands-on experience. (Formerly 4800:460)

BMEN:464 Microfluidics for Biomedical Engineering (3 Credits)
Prerequisites: BMEN 362 or CHEE 321 or BMEN 360. This course will discuss fundamental principles of single and two phase flow of biofluids in microfluidic devices, and present the applications of lab-on-a-chip systems in BME. (Formerly 4800:464)

BMEN:470 Human Factors Engineering (3 Credits)
Prerequisite: Admission to an engineering major within the College of Engineering and Polymer Science. Reliability and human error, human capabilities and limitations, crew protection, display systems, controls and controlling actions, interface design principles, risk management, Safety and accident prevention. (Formerly 4800:470)

BMEN:485 Special Topics in Biomedical Engineering (1-3 Credits)
Prerequisite: Permission of advisor. Directed individual or group research or study in the student's field of interest. Topic subject to approval of advisor. (Formerly 4800:485)

BMEN:491 Biomedical Engineering Design I (2 Credits)
Prerequisites: [BMEN 111 or BMEN 392], BMEN 220, and [(ELEN 307 and BMEN 300 and BMEN 362 and BMEN 365) or (ELEN 340 and ELEN 360 and MECE 203 and BMEN 310)] and admission to an engineering major within the College of Engineering and Polymer Science. Pre/Corequisite: BMEN 305. The design process will be presented utilizing case studies and detailed biomedical engineering design projects. (Formerly 4800:491)  
Gen Ed: Capstone

BMEN:492 Biomedical Engineering Design II (2 Credits)
Prerequisites: BMEN 491 and admission to an engineering major within the College of Engineering and Polymer Science. The design process will be continued utilizing case studies and detailed biomedical engineering design projects. (Formerly 4800:492)

BMEN:498 Introduction to BME Research (2 Credits)
Prerequisites: Permission of instructor. Directed individual or group study in research in biomedical engineering. Course is credit/no credit. May not be repeated. (Formerly 4800:498)

BMEN:499 BME Research Project (1-3 Credits)
Prerequisites: BMEN 498, permission of instructor. Directed individual or group study in research in biomedical engineering. May be repeated. (Formerly 4800:499)
